

Global Disability + Disaster Town Hall: Session 2

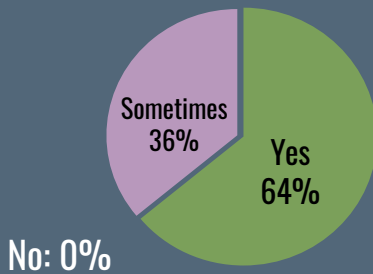

We asked you to share your COVID-19 experiences - we're listening:

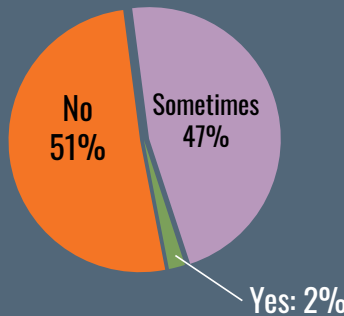

We brought together people with disabilities leading their communities in COVID-19 response to discuss their experiences and needs. We see an overwhelming need for continued conversations about the global need for disability leadership in disaster response.

What have we learned?

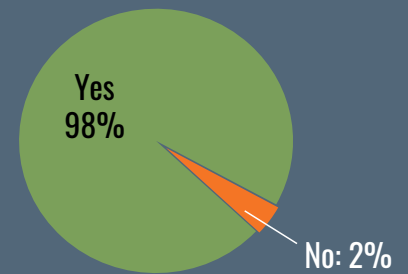

Do you believe that disability-led organizations are left out of traditional disaster relief funding?

During the COVID-19 pandemic, do disability-led organizations have what they need to serve their local communities?

Would you find it useful to continue participating in discussions for disaster relief funding for disability-led organizations?

We're bringing disability leaders and trusted allies together in disasters to **disrupt exclusion and accelerate radical inclusion.**

Thursday, June 4
1 - 2:30 PM EDT

This webinar will serve as a community forum for sharing and storytelling as we, the global disability community, reframe the debate on disability inclusion in disaster planning, response, recovery, and mitigation. Please sign up to speak via our speaker sign up form - we will be prioritizing voices from diverse locations, multiply-marginalized people with disabilities, disability-led organizations, and those who did not speak at our last session.

Hosted by the World Institute on Disability
